

## Request for Council Action

Originator Engineering	Item <b>Request Approval of Master Partnership Agreement between City of Bloomington and Minnesota Department of Transportation</b>
Agenda Section Consent	Date 3/21/2016
Description	

The Minnesota Department of Transportation (MNDOT), Cities and Counties often have the need to share services on multi-jurisdictional projects. The Master Partnership Contract, which lasts for 5 years, allows for a faster and smoother process when services between the City of Bloomington and MNDOT need to be contracted.

Some examples that could be contracted between us are, services and goods such as, cameras, signal cabinet components, survey, construction inspection, bridge inspection and right of way acquisition are. The individual services when needed would be contracted by an attachment to the Partnership Contract called a Work Order which would give specifics about the services provided and the cost. Larger complex projects such as the East Bush Lake Road On-ramp at I494 would have their own agreement.

In the past the City has had this agreement in place with MNDOT, this version is an update to current language and statues.

Staff requests approval to enter into a Master Partnership Contract with the Minnesota Department of Transportation (MNDOT).

The Master Partnership Contract has been reviewed by the Legal Department and a copy is available in the City Manager's office for you to view.

Prepared and Presented by: Shelly Pederson
